

Spirituality is the great opportunity of metaphysical logic. The observation of spiritual affairs defies the interrogation of description, requiring circumscription. This metaphysical floor,  $\phi \alpha$ , constrains a metaphysical quantity. This metaphysical quantification establishes a symbolic representation available to epistemological relationships.

The metaphysical floor derives from the psycho-physiological actuality of the inner consciousness. A metaphysical ceiling,  $\phi \sigma$ , derives from the psycho-physiological actuality of the outer consciousness. Among the abstractions of experiential learning are very large quantities of recognition that defy description as crisp or reproductive.

The events of experience exist among experiential learning in

$$\kappa \psi_{\tau} = \alpha_{\tau} + \beta_{\tau} + \gamma_{\tau} + \delta_{\tau} + \lambda_{\tau} + \sigma_{\tau}$$

such that the psycho-physiological context,  $\phi_{\kappa \psi}$ , of the elements of the semantics of communication,  $\chi_{\phi}$ , have the typical form

$$\phi_{\kappa \psi} = \alpha_{\kappa \psi} + \beta_{\kappa \psi} + \gamma_{\kappa \psi} + \sigma_{\kappa \psi}$$

such that

$$\phi_{\chi} = \phi_{\alpha} + \phi_{\beta} + \phi_{\gamma} + \phi_{\sigma}$$

and

$$\chi_{\phi} = \alpha_{\phi} + \beta_{\phi} + \gamma_{\phi} + \sigma_{\phi}.$$
