

The situation of the intellect,  $\beta$ , is to drive examination and understanding. With the integration of consciousness, generally,

$$\begin{aligned}\kappa\psi_{\tau} &= \alpha_{\tau} + \beta_{\tau} + \gamma_{\tau} + \delta_{\tau} + \lambda_{\tau} + \sigma_{\tau} \\ \phi_{\kappa} &= \phi_{\alpha} + \phi_{\beta} + \phi_{\gamma} + \phi_{\delta} + \phi_{\lambda} + \phi_{\sigma} \\ \chi_{\phi} &= \alpha_{\phi} + \beta_{\phi} + \gamma_{\phi} + \delta_{\phi} + \lambda_{\phi} + \sigma_{\phi}\end{aligned}$$

the demand for intellectual frameworks of understanding rises from the floor of this logical existentialism to the ceiling of mathematics and physics. Understanding our motivation as the intellectual demand that originates in the psycho-physiology of the organism, and has structure which shapes experience and structure is more primal than the meaning of life. With the comprehension of self and other and society available through the understanding of the system of consciousness, we find that all of our questions have answers. We find that we are able to explore and to discover, free from the primal mystery.
